

Epilepsy, Seizures and Black Americans

Did You Know...?

According to the Centers for Disease Control and Prevention (CDC), 578,000 African Americans have epilepsy or a seizure disorder. Having seizures, even a couple a year, may be enough to affect a person's job or school, or ability to care for a family.

STUDY PARTICIPANTS NEEDED

Have You or Someone You Know Been Told by A Doctor That You Have Seizures Starting in The Temporal Lobe?

If so, please contact us to learn about our research study of an investigational drug that may be effective to treat seizures in people who have epilepsy resulting in fewer seizures.

To qualify, you must be 18 years of age or older.

Qualified participants will receive:

- * Study-related physical exams and study treatment at no cost.
- * We cover your time, travel, and housing expenses.
